

NEW EDITION

*"Ruby Bloom is the smartest, most resilient and most beautiful character ever created in Indian Country."*—Lee Maracle

From award-winning author Cherie Dimaline comes a tale of struggle hope and the kind of magic that can only happen when you mix the Mississippi and the Georgian Bay.

Ruby Bloom has a lot going on; her mother is eating herself to death, a soulcrushing museum job, and her flamboyant best friend who humiliates and saves her in equal doses. And then there's a galaxy of odd planets that spin around her head. When Ruby's sent to New Orleans for work, she finds an astronomer in an attic that just might be the way out of her chaotic solar system.

*"Cherie Dimaline writes like an angel. One tough, hard-edged angel, but an angel nonetheless."*

—Tomson Highway

*"Cherie Dimaline is a fabulous writer, a fierce Métis poet-warrior who dances and slashes her way through the hallucinogenic heartbreak and hilarity of contemporary Indigenous experience in Canada. Her word-worlds are tough, tender, and terrifying; she'll tear your heart out, and you will be better—and grateful—for the experience. I've long been a fan of her work, but this book is something fresh and wonderful, and with it she shows again why she's a writer to watch. The Girl Who Grew a Galaxy will grace you with its beauty, touch you with its truth, and haunt your imagination."*

—Daniel Heath Justice Ph.D.
